

Fairfield County Gets a Little Greener

Fairfield County Receives New Recycling Grant

Palmetto Pride has recently awarded Fairfield County the "Palmetto Community Pride Grant" for its "Recycle Bin Project". The three (3) unit recycling center(s) will be placed in most of the County owned and operated facilities.

The County has taken a **proactive** approach and to making recycling **convenient**.
The grant is:

- To help reduce the amount of trash sent to the landfills,
- To inform everyone that you can play a personal role in the reduction of recyclables pollution, and
- To understand the different types of plastics, and which can and cannot be recycled and what aluminum cans and other items can be modified into.

Did you know of all of the many items that are made from recycling? Some examples include: carpets, countertops, picnic tables, sleeping bags, bike parts, back packs or even appliances?
